

The diagram illustrates the system architecture with the following components and connections:

- 主制御部 (Main Control Unit)**: The central processing unit.
- 中核処理装置 (Core Processing Device)**: Connected to the main control unit via bus **2**.
- データ記憶装置 (Data Storage Device)**: Connected to the core processing device via bus **5**.
- 無線装置 (Wireless Device)**: Labeled as **8**, it connects to the main control unit via bus **1** and communicates wirelessly with the mobile phone.
- 移動体通信電話機 (Mobile Communication Phone)**: Labeled as **9**, it receives signals from the wireless device and transmits them back.
- 表示装置 (Display Device)**: Labeled as **6**, it displays information received from the mobile communication phone.
- 端末 (Terminal)**: Labeled as **7**, it also receives signals from the wireless device.
